

WHERE CAN I GET ... ?

## Weatherproof Sporting And Tactical Wallets

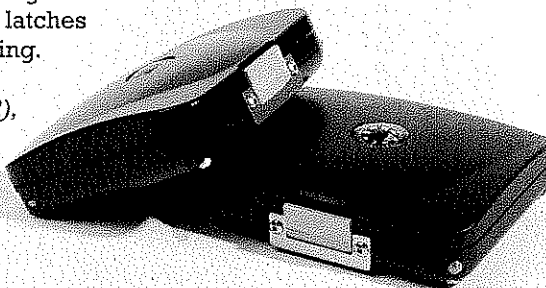

**T**oner Machining Technologies, Inc., with a strong sense of utility in mind, recently released two wallets designed specifically for extreme conditions. Each is essentially identical in form and function, except the Tactical Wallet is CNC-machined from 6061-T6 aluminum and hard-coat anodized, and the Sport Wallet is CNC-machined from Delrin plastic. Also, the Sport Wallet floats, but the Tactical Wallet does not.

Each waterproof wallet features a built-in compass, ink pen, tweezers, tooth pick, carbide glass breaker and a sharp edge designed for self-defense. There are two money clips attached to low-polish removable mirrors on the inside, under which additional storage space is allocated for other accessories. Both wallets also provide protection from RFID-type card-scanning devices.

Push-button and snap-shut latches allow for opening and closing.

## Part guard dog. Part flame thrower.

Exceptionally hot pepper blasting out at 90 mph provides protection like nothing else.

PepperBlaster® II incorporates a pistol grip and sights to quickly target a threat. A simple pull of the trigger releases the first blast of pepper. A second pull of the trigger sends a second blast flying—just in case.

## PepperBlaster II

FASTER • EASIER • SAFER

Caution: Strong irritant. Keep out of reach of children. May be unlawful to own or possess in some states or jurisdictions.
