

TONER

TACTICAL WALLET AND SPORTS WALLET

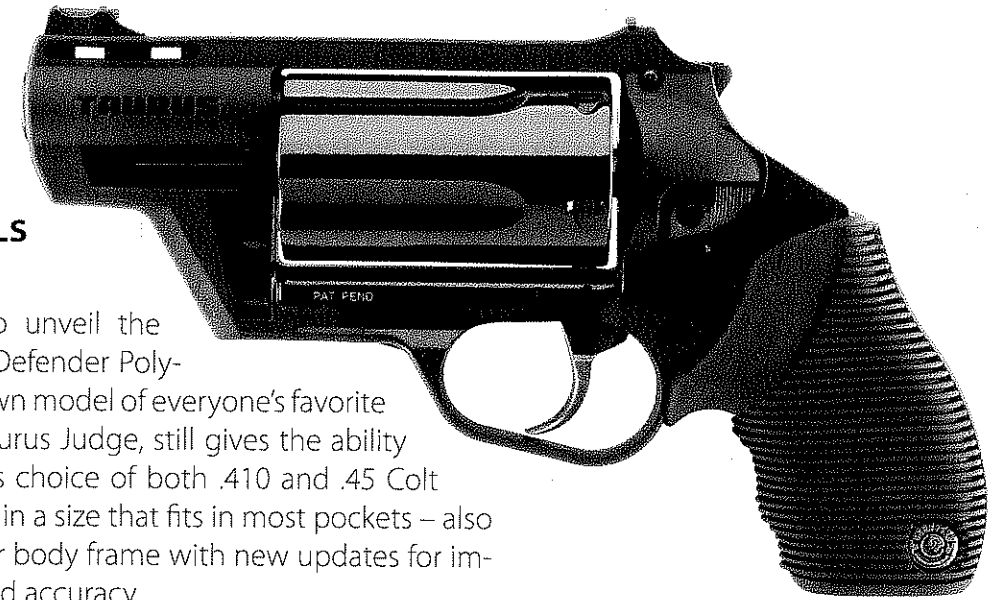

Toner has designed a new patent pending hard case wallet that is precision machined and assembled in America by Toner Machining Technologies in Morganton, North Carolina.

Most of the wallets are sold to men in all branches of the military and law enforcement who regularly give positive feedback. Because the wallets are dust, sand and water proof, they don't have to worry anymore about their pictures, credit cards, important papers and other items getting destroyed from sand, grit and water.

Currently two models are offered, the TMT-Tactical Wallet and the TMT-Sports Wallet. Both models come equipped with a built in compass, ink pen, tweezers, tooth pick, carbide glass breaker, reflector, self-defense striking edge and they are o-ringed sealed to prevent water, sand, dirt or dust from entering the interior of the wallet. Each wallet also has two removable stainless steel money and credit card clips that are polished and can be sharpened and honed to a knife edge, as well as two hidden interior compartments for medication, fishing flies, I-Pod or other small items.

Whether you chose the Tactical wallet or the Sports wallet, both models will give you the ultimate in credit card information protection by actually blocking your personal information from the theft of RFID type scanning devises.

All of these features and more make TMT Wallets the most high tech and functional wallets on the market today. For more information about the products please contact us at 828-432-8007 or visit our website www.tmtwallet.com.

TAURUS UNVEILS NEW JUDGE

Taurus is proud to unveil the new Judge Public Defender Polymer. This scaled down model of everyone's favorite combo gun, the Taurus Judge, still gives the ability to fire the shooter's choice of both .410 and .45 Colt ammunition – now in a size that fits in most pockets – also in a lighter, polymer body frame with new updates for improved handling and accuracy.

Just like its big brother, this little gun delivers amazing versatility and devastating firepower for self-protection. New features include an adjustable rear sight, body styling that conforms to the shooter's grip for secure hold and a new target style hammer and trigger. The Public Defender Polymer is available in blued or stainless steel finishes and weighs only 27 ounces.

Capable of chambering both 2.5 inch .410 shotgun shells and .45 Colt ammunition, this amazing 5-shot combo gun is ideal for short distances - where most altercations occur - or longer distances with the .45 LC ammunition. The rifling has been finely tuned on this small frame revolver to spread the shot pattern at close quarters or to guide the bullet to the target.

All Taurus Judge models include a fiber optic front sight as well as Taurus' ergonomic Ribber Grips. Additionally, like all Taurus handguns, the unique Taurus Security System allows users to securely lock the gun using an inconspicuous key-lock. MSRP \$570.00 - 617.00.
