

LUGGAGE >>

Hard-Core Wallet

Built for the most demanding of circumstances, the TMT Tactical Wallet is a brutally efficient way to carry your money, credit cards, and other valuable documents. CNC-machined from RFID-proof billet 6061-T6 aluminum, this precision device has far more to it than one sees at first glance.

In addition to a nearly indestructible shell sporting a prominent compass, the Tactical Wallet has cleverly hidden tweezers, ink pen, and toothpick.

Surreptitiously built into the wallet's exterior is a self-defense striking edge (not tested), a carbide glass breaker, and a lanyard hole, while clever hidden compartments lurk inside the wallet. Measuring an inch thick and about 3 inches by 3.5 inches, this is not a slick design you slip into your back pocket. Instead, the TMT Tactical Wallet is a finely tuned instrument built for the rugged and extreme conditions we sometimes find ourselves in as motorcyclists. — *Don Williams*

Inside The Doctor

Rick Broadbent is a veteran journalist whose decades of covering the MotoGP circus have given him some extraordinary insight into the big bucks, cutthroat world of the planet's premier motorcycle racing series. Parallel storylines in *Ring of Fire* alternate between following the path of Valentino Rossi's career and Mike Hailwood's triumphant win of the Isle of Man Senior TT in 1978. The contrast shows just how much racing has changed, and yet also how the racers' mindsets have remained the same, especially when it comes to dealing with the dangers and tragedies of the sport.

As an avid race-watcher, I voraciously soak up everything I can. Still, *Ring of Fire* brought me details and anecdotes that I had never read before. It is an immersive page-turner that will rivet you to your seat. Make sure you have a full non-race weekend to read it, as you won't be able to put it down. — *Arthur Coldwells*

BACKPACK >>

Take It With You

Exceptionally comfortable and well balanced, the Alpinestars Protection Pack has the requisite inside tailored pockets and elastic bands to secure your basics, ample space for a laptop, change of clothes and other provisions, as well as three external zippered pockets for quick-access items. Stowed in a bottom zipper compartment is a webbed helmet carrier that clips across the front of the backpack.

Importantly, the Alpinestars Protection Pack has padded protection at the hips and shoulders, and an integrated CE-certified back protector. Padded adjustable shoulder straps combine with adjustable waist and sternum straps to provide a secure fit. Made of water-resistant nylon twill with reflective piping and logo, the zippers are waterproof. — *Kelly Callan*
